**Co-located exhibition**  
MEDICA

### Visitor target groups

- Design engineers
- Engineers and technicians for R&D and production departments
- Heads of research and development departments
- Medical-technology exhibitors from the MEDICA
- Packaging specialists
- Process engineers
- Production managers
- Qualification and validation specialists
- Quality assurance/quality control managers
- Technical procurement managers

### Main product categories

- Manufacturing of components
- Manufacturing of finished products
- Services
- Manufacturing equipment
- Components, modules, OEM equipment
- Electrical components, electronical components
- Microtechnology
- Raw materials, materials, adhesives
- Software, IT

## Statistics MEDICA & COMPAMED 2024

A total of

**5,800**

Exhibitors from  
72 countries

Around

**80,000**

Visitors from  
165 countries

About

**100,000**

Unique users during  
the show days

# Economic data for Germany

## Future prospects for "Medical Technology"

Despite Corona, the companies generated around 34 billion in total sales in 2021, around 3 percent higher than in 2019. Medical technology remains a growing cornerstone of the German economy, but expectations are subdued and sales growth is expected to be lower in 2022. The industry has a positive outlook for the future due to demographic trends, particularly in mature economies, and high levels of healthcare investment in many emerging markets. The market is also being driven by the increasing importance of "health" as a commodity and by new and further technological developments. However, the German medical technology industry's participation in the growth potential will increasingly depend on the European legal framework and a positive investment climate.
