Economic data for Russia

Future prospects for "Medical Technology"

The market for medical technology in Russia recently amounted to around EUR 3.8 billion. An annual growth rate of 1.5 to 2.5 per cent is forecasted until 2020. Government investments are stimulating the healthcare market, accounting for a good 80 per cent. According to management consultants KPMG, the private healthcare market is expected to grow by 20 per cent to EUR 13 billion by 2020. The government has significantly tightened import substitution for medical technology, making market access more difficult for foreign manufacturers of medical technology.
