Staging cycle
Annual

Visitor profile

- Hospitals and medical institutions
- Medical device dealers, agents and retail traders
- Universities and research institutions
- Medical device R&D institutions and manufacturers
- Purchasers and suppliers of medical equipment raw materials, components, accessories and software products
- Investment companies
- Government agencies and associations

Some highlights

Display the world’s latest medical equipment and innovative technology.

Leading platform for medical innovation, so hospital, dealers, colleagues and industrial parks exhibit at same time.

Supported by government, MFC helps you to open the local market easily.

Concurrent event: Global Device Week brings global medical experts to lead the innovation.

Statistics 2018

- Total exhibitors: 207
- Countries: 9
- Professional visitors: 5,478
- Total net exhibition area (m²): 4,017
Future prospects for “Medical Technology”

The market for medical technology in China continues to grow; it is above all the modernisation of the healthcare system that is increasingly creating demand. If growth continues, the medical technology market should even move to second place worldwide, behind the USA, in the next few years. At the same time, the government is focusing on promoting a strong domestic medical-technology sector, as the import ratio in some segments is still between 80 and 90 per cent. Medical technology is in demand in its entire range from high-end X-ray or MRI devices to surgical instruments. Hospitals remain the main customers for medical-technology products, with the proportion of private institutions expected to increase to 30 per cent by 2020.
