**Organiser**  
Messe Düsseldorf (Shanghai)  
Co., Ltd.  
China Service Alliance of  
Medical Devices Innovation  
(CSAMDI)

**Project management**  
Rebecca Qiang

**Staging cycle**  
Annual

### Visitor profile

- Hospitals and medical institutions
- Medical device dealers, agents and retail traders
- Universities and research institutions
- Medical device R&D institutions and manufacturers
- Purchasers and suppliers of medical equipment raw materials, components, accessories and software products
- Investment companies
- Government agencies and associations

### Some highlights

Display the world's latest medical equipment and innovative technology.

Leading platform for medical innovation, so hospital, dealers, colleagues and industrial parks exhibit at same time.

Supported by government, MFC helps you to open the local market easily.

Concurrent event: Global Device Week brings global medical experts to lead the innovation.

### Statistics 2018

# MEDICAlliance

## Economic data for People's Republic of China

### Future prospects for “Medical Technology”

The demand for medical technology in China remains enormous and ranges from high-end magnetic resonance devices all the way to prostheses and surgical instruments. Investments are being made in the modernisation of the healthcare system, in privatisation and increasingly in geriatric care facilities. With the current growth rates of approximately 10 per cent annually, China's market for medical technology should soon become the world's second-largest market after the USA. The good market position of foreign medical technology manufacturers to date is gradually coming under pressure, as China wants to reduce its hitherto high dependence on imports.
