Staging cycle

Annual

Visitor target groups

- Hospitals and medical institutions
- Medical device dealers, agents and retail traders
- Universities and research institutions
- Medical device R&D institutions and manufacturers
- Purchasers and suppliers of medical equipment raw materials, components, accessories and software products
- Investment companies
- Government agencies and associations

Main product categories

- Medical digital imaging products
- Optical and electronic products
- In vitro diagnostic products
- Minimally invasive instruments, implantable and interventional medical devices
- Operating room equipment
- Laboratory equipment
- Medical consumables
- First aid and care products
- Rehabilitation devices and equipment
- Home medical equipment
- Smart medical products
- Medical equipment raw materials, components, accessories and software products
- Other medical related products or services

Statistics 2019

Economic data for People's Republic of China

Future prospects for "Medical Technology"

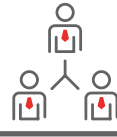

The demand for medical technology in China remains enormous and ranges from high-end magnetic resonance devices all the way to prostheses and surgical instruments. Investments are being made in the modernisation of the healthcare system, in privatisation and increasingly in geriatric care facilities. With the current growth rates of approximately 10 per cent annually, China's market for medical technology should soon become the world's second-largest market after the USA. The good market position of foreign medical technology manufacturers to date is gradually coming under pressure, as China wants to reduce its hitherto high dependence on imports.
