Staging cycle

Annual

Visitor target groups

- Hospitals and medical institutions
- Medical device dealers, agents and retail traders
- Universities and research institutions
- Medical device R&D institutions and manufacturers
- Purchasers and suppliers of medical equipment raw materials, components, accessories and software products
- Investment companies
- Government agencies and associations

Main product categories

- Medical digital imaging products
- Optical and electronic products
- In vitro diagnostic products
- Minimally invasive instruments, implantable and interventional medical devices
- Operating room equipment
- Laboratory equipment
- Medical consumables
- First aid and care products
- Rehabilitation devices and equipment
- Home medical equipment
- Smart medical products
- Medical equipment raw materials, components, accessories and software products
- Other medical related products or services

Statistics 2019

Economic data for People's Republic of China

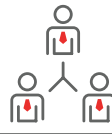

Future prospects for "Medical Technology"

In China, the economy is recovering faster than expected and is gradually moving into a new post-corona reality. After around 20 percent growth last year, the country is continuing to catch up with the USA, the world's largest medical technology market. The demand for medical technology in China remains huge and ranges from high-end magnetic resonance devices and prostheses to surgical instruments and therapeutic devices. Investments are being made in modernising hospitals, e-health and geriatric care, but also in expanding preventive care. The hitherto good market position of foreign medical technology manufacturers is gradually coming under pressure, as China wants to reduce its hitherto high dependence on imports.
