### Future prospects for “Medical Technology”

India continues to be one of the most promising markets for medical technology worldwide. Strong economic growth as well as low inflation and interest rates will further accelerate the development of the sector. According to the market research company Business Monitor, the market volume for medical-technology products is expected to grow to around USD 5 billion by 2020. The industry is also benefiting from increasing medical tourism as well as the increasing importance of telemedicine and M-Health. The Indian medical-technology market's high dependence on imports continues to offer the best opportunities for international manufacturers.
