Visitor target groups

- Industrial trader/distributor/agent/
service provider
- Rehabilitation department of public
hospital/rehabilitation hospital
- Private hospital
- Rehabilitation center
- Retirement home/nursing home/
welfare home
- Medical store
- Individual buyer
- Rehabilitation technology &
equipment supplier
- Construction sector/
construction service
- Investment and financing
- Health insurance
- Government/association
- Civil affairs/disabled persons'
federation
- University/college
- Media

Main product categories

- Intelligent rehabilitation
- Rehabilitation for children
- Sports rehabilitation
- Communication
- Orthopedic aids
- Rehabilitation equipment & treatment
- Mobility and walking aids
- Barrier-free living
- Medical care

Statistics 2022 (Forecast)

Exhibition space (m²)

10,000+

Industry forums

10+

Speakers

50+

Professional visitors

8,000+

Industry media

100+

When reading the figures for the different years, please note that all MEDICAlliance events firstly take place in different rotations and secondly have been partially replaced by digital formats due to the COVID-19 pandemic.

Economic data for People's Republic of China

Future prospects for "Medical Technology"

In China, the economy is recovering faster than expected and is gradually moving into a new post-corona reality. After around 20 percent growth last year, the country is continuing to catch up with the USA, the world's largest medical technology market. The demand for medical technology in China remains huge and ranges from high-end magnetic resonance devices and prostheses to surgical instruments and therapeutic devices. Investments are being made in modernising hospitals, e-health and geriatric care, but also in expanding preventive care. The hitherto good market position of foreign medical technology manufacturers is gradually coming under pressure, as China wants to reduce its hitherto high dependence on imports. Since 2016, China has had an ambitious healthcare program, "Healthy China 2030". The main component is improving the efficiency of healthcare in China.
