Visitor target groups

- General practitioners
- Health ministry officials
- Hospital doctors/
nursing staff
- Hospital managers
- Medical trade
- Medical industry
- Pharmacists
- Physiotherapists
- Public institutions

Main product categories

Medical instrumentation,
equipment and diagnostics
Primary healthcare
Laboratory medicine (test systems,
laboratory equipment, laboratory
diagnostics, laboratory furniture)
Medical consumables, suture materials,
medical clothing, products for patient
care and hygiene products
Design and facilities for hospitals,
physicians' rooms, health and spa centres,
sanitation, disinfection and sterilisation
equipment, sterile products' storage
Medical furniture
High medical technologies for cardiology,
transplantology, neurosurgery, reproductive
medicine, nanotechnologies
Advanced information technologies
in medicine
Maternal and child health, modern medical
technologies
Dentistry
Insurance medicine, individual healthcare
programmes, patient care medical services
Medical research institutes, medical schools
and departments, postgraduate medical
education, medical literature, medical
e-magazines
Medical treatment abroad
Exhibition "Healthy Lifestyle": rehabilitation
and sports medicine, spa technology,
-equipment, -supplies, fitness centres,
health nutrition products, balneology

Economic data for Russia

Future prospects for "Medical Technology"

The virus pandemic is pushing the Russian healthcare system to its limits. The government is responding by building makeshift hospitals in no time at all, increasing funding for bed capacity in existing hospitals and medical technology. Around 412 million euros alone are being spent on expanding the number of beds in hospitals and infection wards, and a further 162 million euros are available to purchase medical technology. The focus here is on respiration equipment, Covid-19 rapid tests and protective suits. The government is temporarily facilitating the import of medical products from abroad to ensure provision for the population.
